I Dove il design incontra la qualità

L'azienda **Majorca Ceramiche** è stata fondata all'inizio degli anni settanta e da allora si è sviluppata continuamente come produttore di piastrelle in gres porcellanato, consolidandosi negli anni come un'azienda conosciuta per la sua vasta gamma di prodotti.

Un programma di costanti investimenti nel tempo in termini di **ricerca, processo e tecnologia** ha permesso all'azienda di realizzare piastrelle di **grande qualità** e dal **design attuale**, incrementando le proprie linee di prodotti costituite da gres porcellanato per pavimenti esterni ed interni e rivestimenti.

Le **migliori materie prime** del mondo vengono selezionate per la nostra produzione ceramica: utilizziamo smalti di altissima qualità, argilla pregiata e materie prime di lunga durata, con **grande attenzione** alla salute umana e all'ambiente. Nelle nostre fasi di produzione la prima priorità è la qualità.

Rigorosi controlli di qualità vengono effettuati durante l'intero processo produttivo, a partire dalla fase di progettazione dei prodotti, seguendo i più **elevati standard** produttivi mondiali e prestando grande cura alla fase del packaging. Il nostro scopo è quello di fornire ai nostri clienti prodotti di altissima qualità: ciò rende **Majorca Ceramiche** una scelta perfetta per la realizzazione di ambienti **moderni e raffinati**, pubblici e residenziali.

| Where design meets quality

Majorca Ceramiche was founded in the early seventies and the company has grown continuously since then as a manufacturer of gres porcelain stoneware tiles, consolidating over the years as a company known for its wide range of products.

A program of constant investments in terms of **research**, **process** and **technology** over time has allowed the company to create **high quality** tiles with a **contemporary design**, expanding its collections of gres porcelain stoneware products for outdoor and indoor floors and wall tiles.

The best raw materials in the world are selected for our ceramic production: we use the highest quality glazes, fine clay and long-lasting raw materials, with **great attention** to human health and environmental awareness. In our production stages the first priority is quality.

Rigorous high-precision quality controls are carried out throughout the entire production process, starting from the design phase of the products, following the **highest world production standards** and paying great attention to the packaging stage. Our purpose is to provide the highest quality products for our customers. This makes **Majorca Ceramiche** a perfect choice for the creation of **modern** and **refined** environments, both public and residential.

CARATTERISTICHE DI SPC SPC CHARACTERISTICS

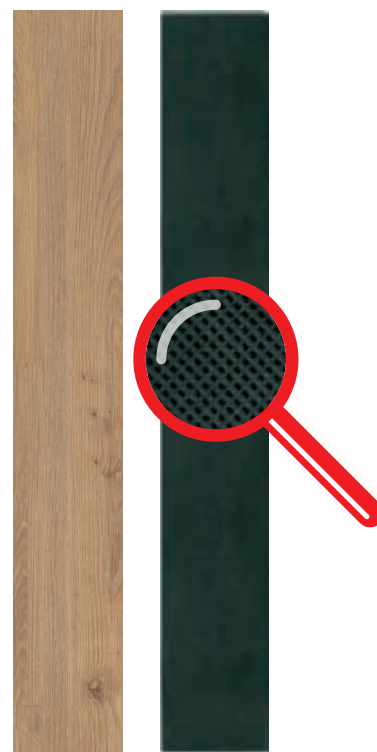

IGNIFUGO, ATOSSICO, SEMPLICE E RAPIDO DA POSARE

SPC è l'acronimo di **Stone Polymer Composite**: un composto di pietra calcarea e polvere di pvc. Diversamente dai pavimenti in vinile (LVT) non c'è alcun elemento interno in plastica. L'anima in pietra di SPC gli conferisce maggiore stabilità rispetto a LVT, che avendo un' anima in plastica, con la pressione da calpestio può cedere, imprimendo sulla propria superficie vinilica i rilievi di difetti e imperfezioni della pavimentazione sottostante.

Oltre ad essere totalmente ignifugo e atossico, SPC è corredato di cuscinetto insonorizzante sul retro di ogni pezzo. Appartiene alla categoria delle superfici calde al tatto anche a rigide temperature. Si posa direttamente sopra il pavimento pre esistente (ad eccezione della moquette) con evidenti e cospicui risparmi di tempo e denaro. Grazie alle particolari scanalature presenti sul bordo di ogni pezzo SPC consente un perfetto incastro tra i pezzi (**Click Technology**).

La rapidità di posa unita alla sua grande economicità, consente a SPC di essere il pavimento ideale per la ristrutturazione di ambienti residenziali, direzionali e commerciali.

Grazie al cuscinetto insonorizzante incorporato sul retro di ogni pezzo, SPC elimina i tipici e molesti rumori propri del calpestio di suole dure o tacchi, rendendolo il pavimento ideale per tutti quegli ambienti che richiedono un'atmosfera di silenzio e discrezione quali biblioteche, aule didattiche, ambulatori, show room, hotel, ecc..

Cuscinetto Insonorizzante
Soundproofing pad

FIREPROOF, ATOXIC, SIMPLE AND QUICK TO LAY

SPC is the acronym for **Stone Polymer Composite**: a compound of limestone and pvc powder. Unlike vinyl floors (LVT), there is no internal plastic element. The stone core of SPC gives it greater stability than LVT, which, having a plastic core, can yield with the pressure from foot traffic, impressing on its vinyl surface the reliefs of defects and imperfections of the underlying flooring.

In addition to being totally fireproof and non-toxic, SPC is equipped with a soundproofing pad on the back of each piece. It belongs to the category of surfaces that are warm to the touch even at low temperatures. It is installed directly on the pre-existing floor (except for the moquette) with obvious and significant saving of time and money. Thanks to the special grooves on the edge of each piece, SPC allows a perfect interlocking between the pieces (**Click Technology**).

The speed of installation combined with its high cost-effectiveness, allows SPC to be the ideal floor for the renovation of residential, offices and commercial environments.

Thanks to the built-in soundproofing pad on the back of each piece, SPC eliminates the typical and annoying noises of the trampling of hard-soled shoes or heels, making it the ideal flooring for all those environments that require an atmosphere of silence and discretion such as libraries, classrooms, clinics, showrooms, hotels, etc.
